The **GHK** is a basic dirt scraper, designed for both hydraulic and pneumatic equipment. Made of strong TecnoLAN polyurethane. The main feature of the scraper is to prevent dust, liquid or other types of dirt from passing through the piston rod into the internal sealing system, which could cause damage to cylinder parts.

Design wipers guidelines		
R	$R \leq 0,5 \text{ mm}$	
r	$r \leq 0,3 \text{ mm}$	
A	$D \leq 70 \text{ mm}$	$D \geq 70 \text{ mm}$
	4 mm	6 mm
